

March 25, 2005

## **CONSTRUCTION NOTICE: Mass Ave Roadway Reconstruction (between Albany Street and Front Street, westbound)**

*During the week of March 28, 2005 (weather permitting), Mass Highway's contractor, the ROADS Corporation, will begin full-depth reconstruction of the roadway on Mass Ave between Albany Street and Front Street, on the westbound side.*

### **What does this construction involve?**

Full-depth roadway construction involves the removal of asphalt and approximately fifteen inches of sub-base from the roadway, and its replacement with new sub-base and asphalt. While doing this work, the contractor also adjusts the height of manhole covers and conducts minor utility work (such as installing new catch basins).

Work zones will be designated with jersey barriers. "*No Parking*" signs will be posted in affected areas at least 24 hours in advance of construction. Please avoid parking in work zones during posted work hours. Traffic will be able to flow in both directions along Mass Ave at all times during this construction.

### **What is the schedule for this project?**

The contractor will be working at this location for approximately one month, and will then move their work zone to the section of roadway between Front Street and Main Street, on the westbound side. Work hours for this construction will be Monday through Friday, 7 AM to 5 PM.

### **Who will address my concerns during construction?**

PK Sen, Resident Engineer for Mass Highway, and Louis Mothon, Project Manager for the Cambridge Department of Public Works, will be on site daily to ensure that the best construction practices are observed.

If you need assistance, or have any questions or concerns during this construction, please contact Rebecca Fuentes, Community Relations Manager for the Department of Public Works at (617) 349-6948/ [rfuentes@cambridgema.gov](mailto:rfuentes@cambridgema.gov); please also contact Rebecca if you have a *special need* or *disability* that requires an accommodation or continuation of special services during construction.

We thank you for your patience during this construction process, and hope you enjoy these improvements to once they are completed.

Sincerely,

Louis Mothon  
Project Manager
